COMPANY HISTORY

ZIEGLER TODAY

In addition to mechanical engineering and automotive, ZIEGLER has now successfully established four own brands and its products: "ZIEGLER Harvesting" (harvest technology), "ZIEGLER Cultivation" (soil cultivation), "ZIEGLER Transport" (one of the largest range of header trailers within the EU) and "ZIEGLER Classic Cars" (with workshop and in-house production of spare parts for vintage and youngtimers).

HISTORY

- 1923** – Founded as an electrical material dealer in Pöttmes
- 1960** – Entry into agricultural engineering (production of feed dampers)
- 1966** – Construction of the first production hall in Pöttmes
- 1981** – Takeover of Mauser and Frankenstolz
- 1986** – Acquisition of the production rights of Diadem
- 1992** – ZIEGLER starts as an automotive supplier in the Czech Republic
- 1995** – Takeover of the Mörthl company, Gemünden am Main
- 1996** – Founding of Zieglera Masinbuve in Daugavpils / Latvia
- 2008** – Acquisition of Walter Keller AG, Switzerland
- 2021** – See text at left side

SUSTAINABILITY

ZIEGLER

ZIEGLER GmbH only uses CO₂-neutral steel. Our steel is produced in Finland and Sweden by the use of hydroelectric power. Our factories are equipped with their own high-performance solar systems. We currently produce 50% of our total electricity consumption by ourselves. In our largest ZIEGLER factory in Latvia (which needs 85% of our total energy consumption) we only use electricity from wind power.
